Unique characteristics that limit availability to only one source, and any justification that no other supplies or services can be used or that urgent and compelling circumstances exist – include all critical delivery or performance dates and impact to the government if dates are not met:

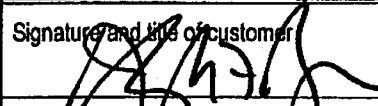

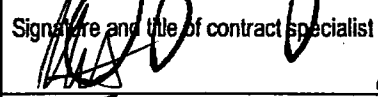

DEA issues, trains and maintains Glock pistols for DEA Special Agents in extremely hazardous and unstable conditions. Standardization saves funding, provides critical training/re-training and operational efficiencies, interchangeability of parts provides logistical savings and most importantly provides vitally important realtime life saving advantages during responses by our fighting force battling a war on drugs.

Describe in detail any market research conducted. Include results and state whether any vendors expressed interest:

Market research, product testing and analysis was conducted by the DEA and FBI to identify reliable and efficient pistols. When combining the results of research, testing and analysis further with on hand inventory of pistols and training/equipment maintenance programs the DEA has determined limiting a purchase to a sole brand name is necessary to avoid retraining of agents and maintainers, reduces the stockpiling of parts and when used in the field during hazardous and unstable conditions provides life saving advantages which are critical to the success of the DEA mission.

The Contracting Officer hereby certifies that:

- A. Only one source is reasonably available;
- B. An order for the supplies or services will not be placed unless the price is determined to be fair and reasonable; and
- C. If brand name specifications are used for the basis of this determination and the acquisition exceeds \$25,000, this Limited Source Documentation will be made available together with the solicitation in the Governmentwide Point of Entry (FedBizOpps) in accordance with FAR 5.102(a)(6), on GSA e-Buy in accordance with FAR 8.405-6(d), or on the NASA SEWP V Quote Request Tool pursuant to 40 U.S.C. 11302(e).
